

Deployment Readiness Report

Generated at: 2026-02-14 16:56:37
App: **Laravel** — Laravel **12.51.0** — PHP **8.2.4**
Environment: **local** | Debug: **ON** | URL: **http://localhost**

Customer Overview

School	Polgahawela British International College
Developed by	twinsoft.com
What this system does	A web-based School Finance & Administration system to manage students and teachers, record revenue/expenses, automate routine finance tasks, and generate detailed reports with strong role/permission security.
Key highlights	- Teacher salary management with EPF/ETF calculations - Student management (add/edit/search/statements) - Role-based permissions for all modules - Complete reports: finance, ledger, cash/bank, dues, EPF/ETF, collections

Go-Live Checklist

Item	Detail	Status
Set production env variables	APP_ENV=production, APP_DEBUG=false, APP_URL=https://your-domain	ACTION
Cache config/routes/views	php artisan optimize (or config:cache, route:cache, view:cache)	OK
Storage + cache write permissions	storage/ and bootstrap/cache must be writable by web server user	OK
Database & migrations	Confirm DB credentials, run php artisan migrate --force	MANUAL
Queue worker running	If using database queue, run a worker via Supervisor/systemd	MANUAL
Scheduler running	Set cron to run php artisan schedule:run every minute	MANUAL
Mail/SMS real providers configured	mail.default and SMS settings must use real credentials in production	ACTION
HTTPS + secure cookies	Force HTTPS at the edge; set SESSION_SECURE_COOKIE=true	MANUAL

Runtime Summary

Category	Values
Cache	Config cached: yes Routes cached: yes Events cached: yes Views cache dir: present
Drivers	DB: mysql Cache: database Queue: database Session: database Mail: log Log: stack
Storage	public/storage exists: yes is symlink: yes storage/ writable: yes bootstrap/cache writable: yes

Category	Values
Audit Logs	Retention days: 10 (scheduled prune)

Available Functions (Features)

Derived from controllers and registered routes. This describes what the system can do.

Audit Logs

- AuditLogController

Authentication

- AuthenticatedSessionController
- ConfirmablePasswordController
- EmailVerificationNotificationController
- EmailVerificationPromptController
- NewPasswordController
- PasswordController
- PasswordResetLinkController
- RegisteredUserController
- TwoFactorController
- VerifyEmailController

Classrooms

- ClassRoomController

Dashboard

- DashboardController

Expenses

- ExpenseCategoryController
- ExpenseController

Extra Classes

- ExtraClassController

Other

- AcademicYearController
- BackupSettingsController
- Controller
- EmailSettingsController
- GeneralSettingsController
- OpeningBalanceSettingsController
- ProfileController
- RoleController
- SalaryComponentSettingsController
- StorageController
- SystemStatusController
- VisitingTeacherController

Printing / Receipts

- PrinterSettingsController
- PrinterSlipController

Promotions

- PromotionController
- PromotionSettingsController

Reports

- ReportController

Revenue / Fees

- RevenueAdjustmentController
- RevenueCategoryCollectionController
- RevenueCategoryController
- RevenueController
- RevenueReminderController

SMS

- SmsController
- SmsSettingsController

Seminars

- SeminarController
- SeminarPaymentController
- SeminarReportController

Students

- StudentController
- StudentsBulkUploadController

System Admin Lock

- OnlyAdminController

Teacher Salaries

- TeacherSalaryPaymentController

Teachers

- TeacherController
- TeacherLookupController
- TeachersBulkUploadController
