1) Overview

This system is a web-based School Finance & Administration platform that helps you manage students and teachers, record revenue and expenses, and generate detailed operational and statutory reports (including EPF/ETF).

2) Login & Navigation

1. Open the system URL in your browser.
2. Login using your username/email and password.
3. Use the menu to open modules like Students, Teachers, Salary Payments, Reports, and Settings.

Note: What you can see depends on your role permissions.

3) Roles & Permissions (RBAC)

Use RBAC to control access per user role (recommended: least privilege).

3.1 Create roles

1. Go to **RBAC → Roles**.
2. Create roles like *Admin, Accountant, Office Staff, Principal*.
3. Assign permissions for each module (students, teachers, salary, reports, settings).

4) Students — Add & Manage

4.1 Add a student

1. Open **Students**.
2. Click **Add**.
3. Fill student details (name, class/grade, guardian contact, etc.).
4. Save.

4.2 Update / search / statement

- Use search to find a student quickly.
- Open student profile to edit details.
- Use **Statement** to view payment/due history.

4.3 Promotions / alumni

- Promote/demote a student (or do bulk promote/demote if enabled).
- Mark students as Alumni when they leave, manage leaving documents, and readmit if needed.

4.4 Bulk upload

1. Open Students → Bulk Upload.
2. Download template and fill carefully.
3. Upload and fix any validation errors shown by the system.

5) Teachers — Add & Manage

5.1 Add a teacher

1. Open **Teachers**.
2. Click **Add**.

3. Enter teacher details and save.

5.2 Manage salary setup

- Open a teacher profile to update salary-related details (components/deductions if configured).
- Confirm EPF/ETF related settings as per your payroll rules.

5.3 Visiting teachers + bulk upload

- Use Visiting Teachers module if your school uses visiting staff.
- Use Teacher Bulk Upload for fast onboarding.

6) Teacher Salary Payments + EPF/ETF

6.1 Configure salary components (one-time)

1. Go to Settings → Salary Components.
2. Add/update components (basic, allowances, deductions, EPF/ETF items if used).

6.2 Create a salary payment

1. Open Teacher Salary Payments.
2. Click Create.
3. Select teacher and month, enter the salary details.
4. Save.
5. Generate payslip/receipt and email payslip (if email is configured).

6.3 EPF/ETF reports

- Reports → Teacher EPF
- Reports → Teacher ETF
- Reports → Company EPF
- Reports → EPF/ETF Totals

7) Revenue / Fees (Collections)

7.1 Setup categories

1. Open Revenue Categories.
2. Create fee categories (tuition, admission, term fees, etc.).
3. If needed, link categories to classes for class-based collections.

7.2 Collect a payment + print receipt

1. Open Revenue Items → Create.
2. Select student, fee category, amount, and payment method (cash/bank/cheque).
3. Save and open Receipt to print/download.

7.3 Refunds / waivers / cheques

- Use Refund or Waiver for corrections/discounts with proper records.
- Track cheques and update status (passed/returned) when cleared.

8) Expenses

1. Create expense categories first.
2. Add expense items with amount, date, and description.

9) Reports

Common reports available:

- Revenue / Expense / Outflows / Financial summary
- Daily ledger
- Cash transactions / Bank transactions
- Cheque history
- Student due reports + due aging + top due
- Fee collection summary / by class / by category / vs expected
- Seminar and extra-class collection
- EPF/ETF statutory reports

10) Settings & Backups

- Configure Email and SMS and run test messages.
- Configure Printer settings for receipts and payslips.
- Set Opening Balance for accurate reporting.
- Use Backups settings to run and download backups regularly.

11) Troubleshooting

- **Missing menus:** ask admin to update role permissions.
- **Email/SMS not sending:** ensure real provider credentials are configured.
- **Printing issues:** confirm printer settings and browser print permissions.

Technical info: Laravel (Laravel 12.51.0, PHP 8.2.4).
